Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

20) ☐ Other:

Art Unit: 1724

The disclosure is objected to because of the following informalities: (1) the specification fails to contain a brief description of the drawings, as required by 37 CFR § 1.74; and (2) drawing elements 2, 16, 17, 20 and 21 have not been described in the specification. Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 6, 8-13, 15, 18-20 and 22 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. Claims 6 and 20 recite that the sieve feed stock is regenerated by a process which consists in heating the feed stock to a temperature between 120°C and 300°C, but depend from a claim (i.e. claim 1, directly or indirectly) which requires a two stage regeneration at mutually exclusive temperatures. Claims 6 and 20 also recite a regeneration pressure of less than 100mm Hg, but depend from a claim requiring a regeneration pressure of about atmospheric (see claim 1, line 6). Accordingly, claims 6 and 20 are indefinite as to the regeneration conditions employed. Claims 9, 10 and 15

Art Unit: 1724

depend from either claim 6 or claim 20, and are therefore also indefinite. Similarly, claim 8 is indefinite because it recites carrying out step (i) at two different temperatures, while parent claim 1 appears to recite only a single temperature, i.e. due to the recitation "consists in ... (i) at a temperature ...", for this step. Claims 18 and 19 depend from claim 8, and are hence also indefinite. The terms "the pressure" (claims 2, 12 and 13) and "the temperature" (claim 11) are indefinite, since it is not clear which pressure and temperature (i.e. treatment or regeneration) is intended. Furthermore, the term "inert has" (claim 22) is deemed to be a typographical error which renders this claim indefinite. Applicant is advised that an amendment changing "has" to --- gas --- in claim 22 would overcome this portion of the rejection.

Claims 1, 3-5, 14, 16, 17 and 21 are allowed. Claims 2, 6, 8-13, 15, 18-20 and 22 would also be allowed if rewritten or amended to overcome the above rejection under 35 U.S.C. § 112.
